PROMO6A-PMI224

Sample pack PMI224

Product information:

1 meter sample pack of the PMI224. The PMI224 is a high-quality microphone cable with a highly flexible outer jacket. This cable is made rigid, which allows you to roll it up, even at longer lengths effortlessly. Two 24 AWG (0.22 mm²) conductors consisting of 12 copper strands with 0.15 mm thickness are surrounded by an 80-strand braided copper shielding with superior coverage. Combined with the thick and soft PVC outer jacket, this provides a flexible but solid feel while allowing it to withstand an extreme amount of bending cycles. Optimal signal transmission is guaranteed due to the low capacitance and use of high-purity copper, while the high-coverage shielding provides excellent immunity against interference. These features make the PMI224 perfect for use in professional stage & studio applications.

Certification:

MADE IN EUROPE

Properties:

Meter indicator

Inner Conductors:

STRANDED COPPER

Shielding:

BARE COPPER BRAIDING
